EZ Lynk Instructions

Installation Steps

Living up to the brand name, EZ LYNK has made the installation process simple. We've broken down each step and provided some valuable information that will help you understand how your AutoAgent works.

Step One: Download & Install the AutoAgent App

The AutoAgent app is available for most smart devices. It requires iOS 8+ or Android 5+ to operate.

	CREATE AN ACCOUNT									
									Ŷ	
q	W			r 🗌	t	y u			p p	
		s	d	f	g	h	i.	k		
ŵ		Z	x	С	V	b	n	m	8	
1		123		spac	e	6			lext.	

Step Two: Create an Account

From the AutoAgent app, select 'create an account'. You will need to verify that your email address is valid upon creation.

Step Three: Place Your Key in the 'Run' Position

Turn your key all the way over without starting the vehicle. This will boot your vehicle's engine computer allowing the AutoAgent to communicate with it. If you have a push-to-start vehicle, you should press the Start button twice.

Step Four: Plug the AutoAgent into your OBD-II Port

With the key in the 'Run' position, plug your AutoAgent into your vehicle's On-Board Diagnostics port. You can verify that it has booted correctly when you see that a blue and green light are illuminating from the device.

Step Five: Connect to your AutoAgent from your Smart Device

Navigate to the WiFi settings of your smart device and select the 'EZLYNK_####' network. A check mark will appear next to the network name when you have successfully connected. The AutoAgent 2 also allows you to connect via Bluetooth.

Step Six: Open the AutoAgent App

After you've successfully connected, you can navigate back to the AutoAgent app. You should now be able to see your vehicle gauges.

Step Seven: Lynk your Vehicle

When it asks you the email of your tuner, you will put in <u>ezlynk@runvse.com</u>. If your smart device has cellular data, you will notice that a message has appeared asking you to lynk the vehicle. Follow these prompts to connect your vehicle with your mechanic/technician. If your smart device does not have cellular data, you will need to connect to an internet available network and re-open the app to complete the lynking process.

<	ECU PROFILE
Sample ECU Profile 2 READY TO INSTALL	Install
DETAILS	
Technician	Sample Technician
Make	Ford
Model	Superduty F-250/F-350
Year	2013-2014

Step Eight: Program Your Vehicle After completing the lynking steps you are ready to flash your vehicle.

Navigate to > Vehicle > ECU Profiles. Here you can view the list of tunes or ECU profiles that are available to you.

Tap the button to download your desired ECU profile, followed by the 'Install' button to flash your vehicle. The app will guide you through the flashing procedure.

(When using a smart devices without cellular data you will need to switch to an internet available network to download the ECU profile, then back to the EZ LYNK network to install the ECU profile.)
